PROFILE

SE student at CODE Berlin. I build AI agents, run growth at an AI startup and turn floor plans into magazines.

Looking for a summer 2027 internship (May to September, 3 to 5 months, ideally in person) in backend, frontend, full stack or AI engineering. Open to relocating to the US. J-1 internship visa handled through a sponsor organization.

EXPERIENCE

Head of Marketing · mitJulia

Oct 2026 to present

AI receptionist that picks up the phone for hair salons. Joined to help take the company to 1M ARR. I own the content strategy, write the video scripts and run our Meta Ads, and built an AI video cutter that edits, refines and animates footage on its own.

Student Researcher, Hardware Focus Display · CODE University

Oct 2026 to present

With my Software Engineering professor: a small hardware display next to your computer that shows whether your code is still running and whether you are heads-down or free to talk. Building both the software and the hardware side.

Co-Builder · Floor Plan to Magazine (Alchitect)

Sep 2026 to present

Pipeline that turns an architect's DWG files and floor plans into clean geometry, a 3D model, V-Ray and Veras renders and a print-ready magazine. Runs end to end and cuts the process from about three months to about a week. I own process analysis, tool research, automation design and the first version of the code, mostly in Python.

Founder · untangle

Apr 2026 to present

One-person studio for making complicated things easy to understand. Brand, copy and tech: websites, explainers and AI agents. Four of my own agents run daily on Claude, including a weekly newsletter writer, an email triage agent and a to-do system fed by my inbox and calendar.

AI and Operations Intern · Dr. Olivia Byza, Psychology Coaching

Apr 2026 to Jun 2026

Automated the practice's daily workflows with AI agents, ran outreach to partner organizations and designed client material, including a 32 page illustrated workbook from concept to final copy.

Au Pair · Culture Care, San Francisco

Aug 2025 to Jul 2026

A year with a host family, responsible for the kids' everyday life and logistics. On the side: Stanford Continuing Studies in technology leadership and teaching myself to build AI agents.

Operations · TheLivingroom (family restaurant)

Dec 2022 to Jul 2025

Helped run service, coordinate staff and keep guests happy on busy nights for three years.

Private Tutor · Math and languages

Apr 2022 to May 2025

HACKATHONS

Vibeolingo · 2nd place. App that teaches building the way Duolingo teaches a language. App development and design.

Taxfix Challenge, Cursor Hackathon · 2nd place. Scan a receipt, get up to 80 percent of the deductible amount as in-app credit. Research, concept and video.

EDUCATION

B.Sc. Software Engineering · CODE University of Applied Sciences, Berlin

Expected Jul 2029

Project-based degree with practice phases inside partner companies.

Technology Leadership · Stanford University, Continuing Studies

Nov 2025

Abitur · Erich Kästner Gymnasium

Jun 2025

Advanced course in computer science.

SKILLS

Advanced: AI Agents, JavaScript, Prompt Engineering, Generative AI, Java, HTML

Intermediate: Python, SQL, AutoCAD · **Beginner:** TypeScript

Languages: German (native), English (fluent), Mandarin (HSK 3), Spanish (basic)
